

Building Information Modelling Policy

Sir Frederick Snow & Partners Ltd and Snow Consulting Ltd are committed to providing high quality services to our clients and to contributing effectively to the project teams in which we work. This commitment includes a commitment to the appropriate use of Building Information Modelling (BIM) as described in PAS 1192-2 and/or BS EN ISO 19650-1&2, as required by our clients.

We will therefore:

- Continue to invest in providing our staff with the necessary software, knowledge and skills to deliver BIM level 2 for our projects;
- Discuss the potential benefits of BIM with our clients and other team members and agree appropriate approaches for each project;
- Implement efficiently the mandated level of BIM on each of our projects;
- Collaborate effectively with other members of our project teams to undertake efficient management of Building Information; and
- Learn lessons from our BIM implementation on each project and seek to progressively improve our processes and procedures.

This policy is reviewed at least once a year and updated as necessary to improve our Quality Management System

Paul Drobig
Managing Director
